

AKASH SHARMA

Machine Learning / Data Science

Lucknow, Uttar Pradesh, India | 9219747670 | akash6392614083@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

BCA graduate and aspiring Machine Learning / Data Science professional with hands-on experience building machine learning projects using Python, Pandas, NumPy, Scikit-learn and SQL/MySQL. Skilled in data cleaning, data preprocessing, exploratory data analysis (EDA), feature engineering, model training and model evaluation across classification, regression and clustering problems. Built and evaluated models including Logistic Regression, Random Forest, XGBoost and K-Means, and integrated trained models into web-based applications using Flask. Seeking an entry-level Machine Learning or Data Science role.

TECHNICAL SKILLS

Programming: Python

Data Science: Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering

Machine Learning: Scikit-learn, Linear Regression, Logistic Regression, K-Nearest Neighbors (KNN), Naive Bayes, Decision Tree, Random Forest, SVM, K-Means, Hierarchical Clustering, PCA, Lasso, Ridge, AdaBoost, Gradient Descent, Bagging, Boosting, XGBoost, Cross-Validation, Model Evaluation

Database: SQL, MySQL

Web / Integration: Flask

Tools / Deployment: Git, GitHub, Render

PROJECTS

Smart Recruitment System [GitHub](#) [Live](#)

Technologies: Python, Scikit-learn, Logistic Regression, Flask, MySQL

- Built an ML-based recruitment application that evaluates candidate information and supports candidate shortlisting.
- Preprocessed candidate features and trained and evaluated a Logistic Regression classification model.
- Integrated the trained ML model with a Flask application and MySQL database for candidate and manager workflows.

AI Banking System [Live](#)

Technologies: Python, Flask, MySQL, Machine Learning

- Developed a banking-system project with customer and manager workflows, including loan applications and approval/rejection.
- Integrated machine learning based loan decision support into the application.
- Implemented database-backed workflows with chatbot-based explanations and notifications.

AI Chatbot [GitHub](#) [Live](#)

Technologies: Python, Scikit-learn, TF-IDF, Flask, APIs

- Built an intent-based chatbot using machine learning and text classification.
- Applied TF-IDF text processing and intent classification with fuzzy matching to handle user queries.
- Added conversational responses, Hindi/Hinglish support, weather API integration, calculator functionality and date/time features.

SMS Spam Classifier [GitHub](#) [Live](#)

Technologies: Python, TF-IDF, Scikit-learn

- Built a text classification model to identify spam and legitimate SMS messages.
- Applied TF-IDF vectorization and supervised machine learning; achieved approximately 97% accuracy during project evaluation.

Car Price Prediction [GitHub](#) [Live](#)

Technologies: Python, Pandas, Scikit-learn, Regression

- Built a machine learning regression project for predicting car prices.
- Performed missing-value handling, preprocessing, feature encoding and model pipeline creation.

EDUCATION

Bachelor of Computer Applications (BCA)

SVN Institute of Higher Studies — Dr. Ram Manohar Lohia Avadh University

2026 | CGPA: 7.4
